The Future in Motion

**At your service.
Anywhere.**

High Performance Multi Purpose Tires

MPT81

Powerful drive

Everybody knows him. The employee who knows how to get things done - whatever the requirements. He is your all-rounder in all areas. He always proves his best qualities and is never disturbed by a single thing. We have this employee too: Whether on or off the road, muddy or stony, cold or hot, wet, snowy or dry the Continental MPT81 performs - anywhere.

Multi functional tread design

Turtle Shield Design

Special tread design with multiple block geometries

Feature

Effect

Benefit

Applications

Vehicles

Three variations in tread depths

High performance on any surface

Rescue services | Forestry | Construction sites | Municipal application | Winter road service

Municipal vehicles | Pickup trucks | Mobile homes | Offroad trucks | Wheel loader | Telehandler

Protection of upper sidewall and shoulder area

Robustness and puncture resistance

Excellent self cleaning capabilities

High traction performance

70E

Robust precision

Your vehicles will follow a perfectly coordinated choreography. Like a dancer, they perform true masterpieces on the smallest piece of ground. Even if the surface changes, your vehicles are not allowed to make any mistakes and must adapt perfectly to the situation. They owe their grip to their tires transferring the movement to the ground in exact steps. Rely on our robust and precise tire, Continental 70E.

Two-fold pattern design

Symmetric pattern design

Tight rim fit

Feature

Effect

Benefit

Applications

Vehicles

Dense block configuration with open outer tread design

High work efficiency and low fuel consumption

Construction sites | Forestry | Agriculture | All terrain

Wheel loader | Telehandler

High traction capability in forward and backward direction

High work efficiency

Bead protection of sidewall

Risk of flat tire reduced

Legal aspects

Since 2018, only winter tires with the tire sidewall marking Three Peak Mountain Snow Flake (3PMSF) are permitted on road traffic in the event of black ice, slush, icy conditions, slippery frost and packed snow according to §2 StVO (German Road Traffic Act).

However, this obligation is not compatible with regulation 117 of UN/ECE* which says: According to this regulation, the 3PMSF symbol may not be used together with a Professional off-Road (POR) inscription which is binding for MPT tires.

Consequently, the use of MPT tires in winter conditions was legally not clearly defined since January 2018.

In order to solve this contradiction, the Federal Ministry of Transport and Digital Infrastructure (BMVI) in Germany has recently issued an explicit exception of the 3PMSF-obligation for MPT tires in the German transport Gazette.
